## **1. Intorduction**

### **1.1 Objective of the Project**

A truly Indian social-networking website that is to promote social responsibilities like injustice, inhumanity, corruption, violations etc.

### **1.2 Problem Definition**

Through the existing system process which is purely manual and time taking process, people cannot voice out violations, injustice, inhumanity, corruption happening in different sectors so there have to a solution to this process.

### **1.3 Modules:**

1. Administrator
2. Users
3. Registration
4. Posts

6. Comments
7. Friends

### **1.4 Users:**

1. Administrator
2. Friends
3. Authenticate Users
4. Public User

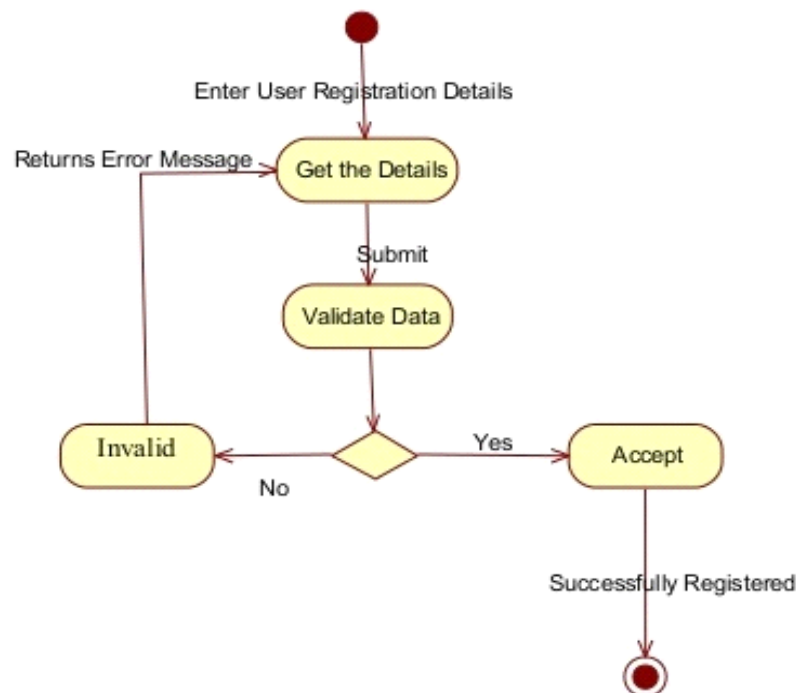

## 2. Abstract

A truly Indian social-networking website that is to promote social responsibilities like traffic violations, injustice to people etc. It should provide a common platform where people of India can voice out violations, injustice, inhumanity, corruption happening in different sectors of government. In existing system, people do not have the ability to tag social discipline violators. Citizens of India cannot control and monitor the social responsibility on their own. Everybody is violating the rules. No one is taking care. The responsible persons are ignoring these problems because of corruption. No one is feeling responsible to argue. So that with this in our country the law and order is going out of control.

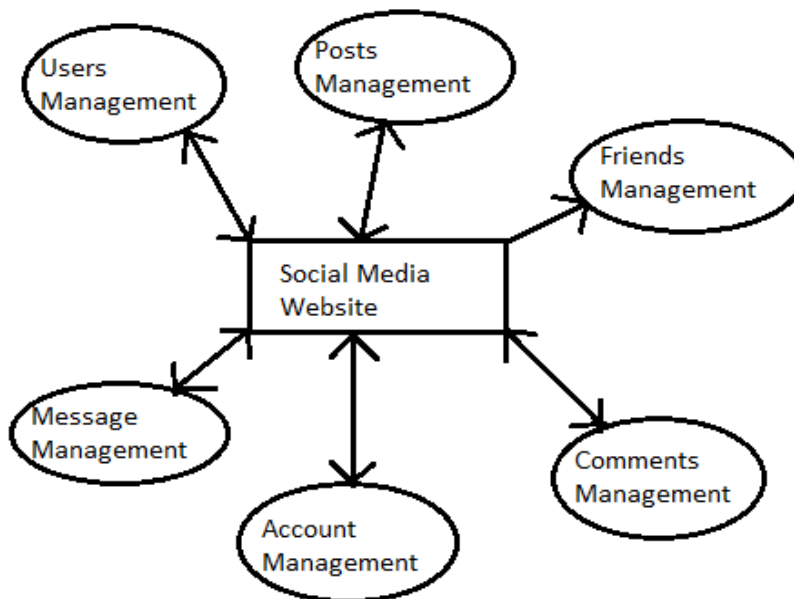

Now using this our current system (this website), people are close to each other socially. Here each and every person has the authority to discuss on any topic. With this innocent people can get aware. Then on the basis of these discussions the right decision can be taken by concerned authority.

## 3. Diagrams related to Object Oriented technology

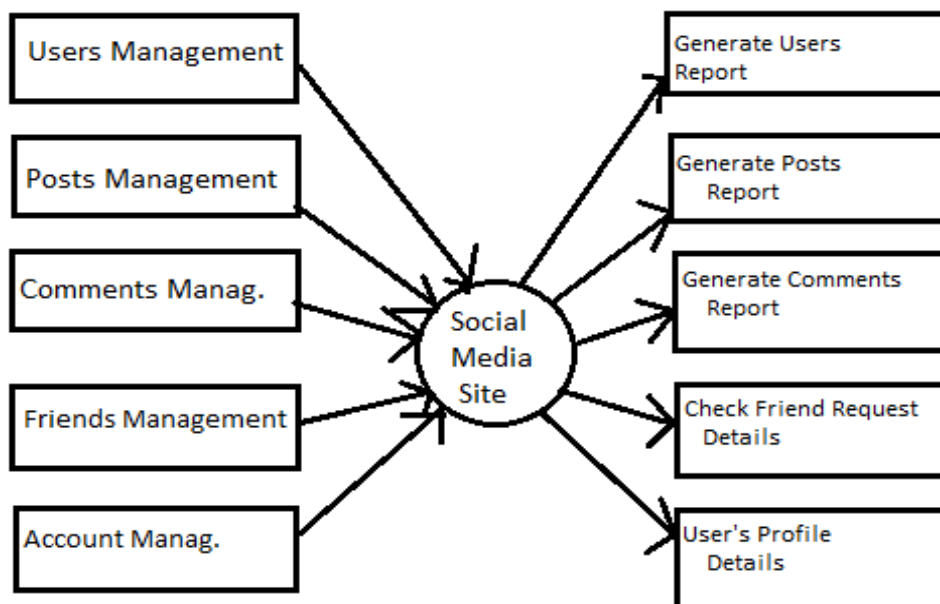

### 3.1. Activity diagram of registration

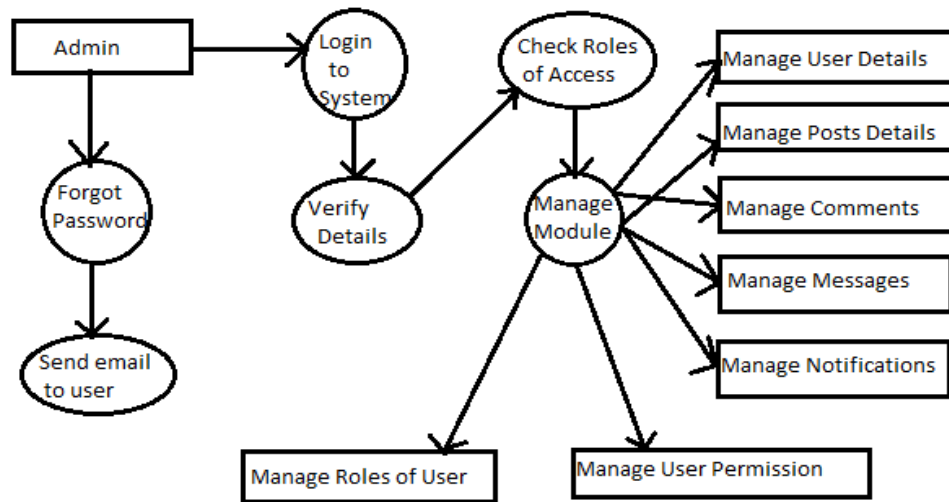

### 3.2. Data Flow Diagram (Level 0)

### 3.3. Data Flow Diagram (Level 1)

### 3.4. Data Flow Diagram (Level 2)
